

Profile

Product Designer with 4+ years shaping complex SaaS workflows into clear, intuitive user journeys. I approach problems through user behavior, not surface UI, and focus on simplifying structure, reducing cognitive load, and aligning product logic with real user expectations. I work closely with product and engineering, question assumptions early, and treat UX as a problem-solving process grounded in evidence and usability—not decoration.

Experience

Product Designer · Boostmyshop

JAN 2022 - Present (Pondicherry)

- **Directed** UX across myWebPOS, myPricing and myMarket, aligning workflows with merchant needs and driving product adoption
- **Engineered** myWebPOS from the ground up, defining POS workflows and IA that eliminated merchant friction
- **Merged** fragmented modules into a single onboarding flow, **boosting activation 18% → 57%** and **cutting setup time 55%**
- **Rebuilt** pricing workflows with an in-product bulk editor, **reducing edits from 20m → <2m** and **lifting adoption 15% → 68%**
- **Implemented** layered competitive-intelligence UX that **increased daily usage 200%+** and enabled strategic pricing decisions
- **Improved** task completion by **15–25%**, increased feature discovery by **20–30%**, and reduced drop-offs by **18–25%**.
- **Established** usability analysis frameworks (funnels, heatmaps, session reviews), reducing repeated user errors
- **Partnered** with PM & Engineering to enforce product logic and eliminate UI-only patches

UX/UI Designer · Cloudzoo

APR 2021 - OCT 2021 (Tirupur)

- **Designed** high-fidelity journeys and validated them with engineering to reduce rework
- **Interviewed** users to identify checkout friction and translated insights into workflow improvements
- **Optimized** transaction and onboarding flows, improving task completion and reducing drop-offs

Education

Graduation - Bachelor's in Computer Science

2017 - 2021 · INFO Institute Of Engineering , Coimbatore

Specialities

- UX/UI design for SaaS and complex product workflows
- User flows, information architecture & navigation models
- Wireframes, prototypes & high-fidelity interaction design
- Usability testing, iterative validation & behavioral analysis
- Visual hierarchy, layout systems & responsive UI
- Data-driven UX decisions focused on conversion & adoption
- Workflow simplification for high-volume user paths
- Cross-functional collaboration with product & engineering
- Translating business goals into user-centered workflows
- Optimizing feature activation, onboarding & user retention

Tools

Design & Prototyping:

Figma | Adobe XD | Framer | Zeplin

Research & Collaboration:

Miro | Notion | Trello

AI & Workflow:

ChatGPT | Relume | VO | Lovable |
TypingMind | UX Pilot | Bolt.new

Analytics & Testing:

Mixpanel | Zoho PageSense
